Workshop de Docker

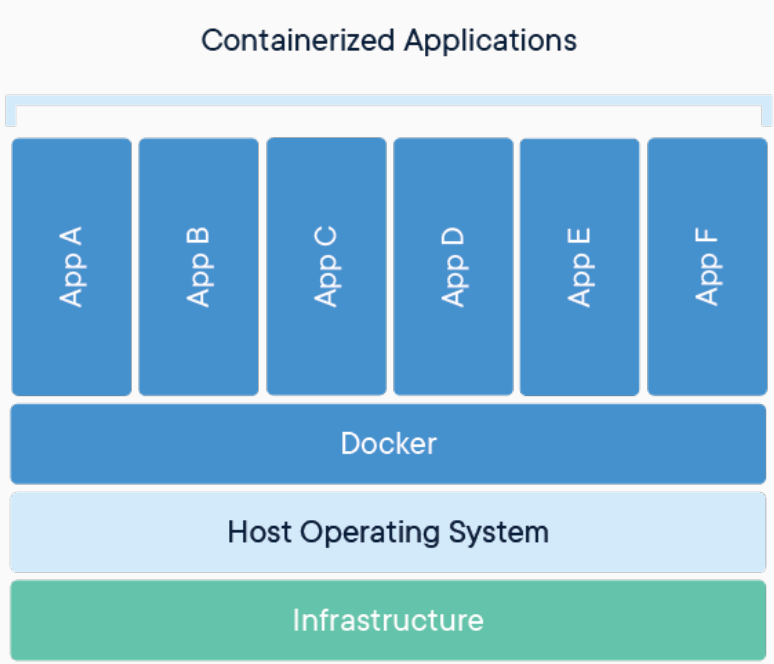
What is Docker?

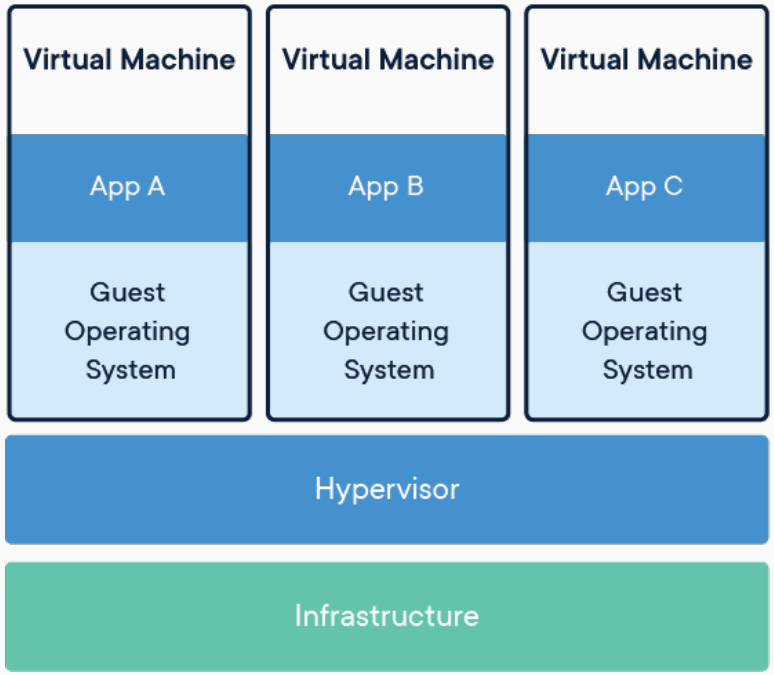
"Docker is an open platform for developing, shipping, and running applications"

- Separates your applications from your infrastructure.
- Manages your infrastructure in the same way you manage your applications.
- Reduces the delay between writing code and running it in production.

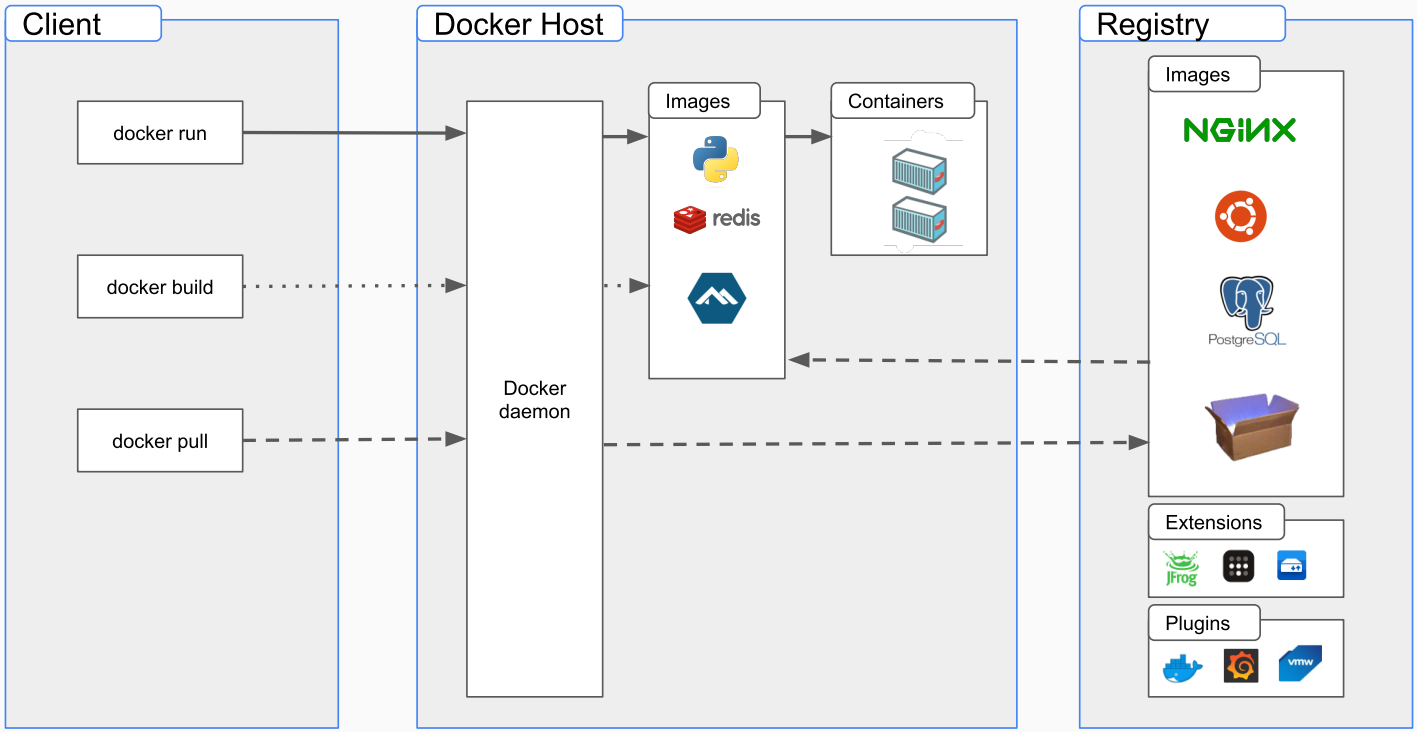
Why use Docker?

Containers and Virtual Machines





Architecture Overview



Operating System Support

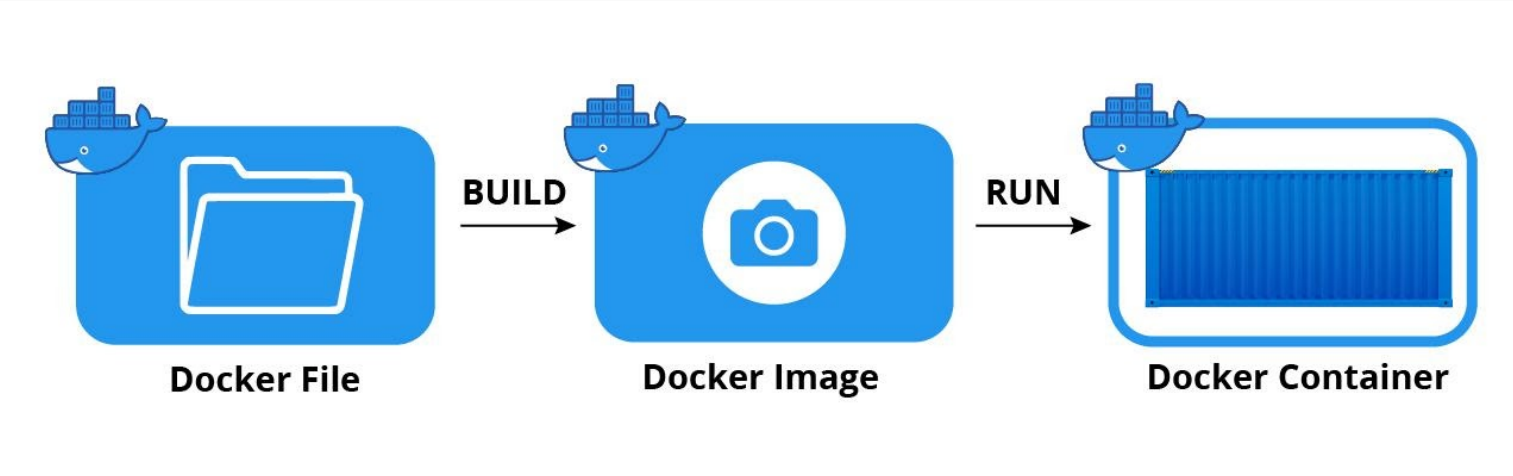
Docker runs on all major operating systems!

Hyper-V WSL

Native

Linux VM

Images and Containers



Let’s get to work?
